ABSTRACT

This paper makes analyses of the civilization and its impact on people's life. On this case, most appropriate analyses of the society were mentioned in the example of the life style of the people. Civilization of the society were mentioned as a major investigation point at all.

Keywords: Civilization, impact, people, society, research.

1. INTRODUCTION

It is well-known that the high spirituality of the peoples of the East and the Uzbek nation has left the admiration of the whole human race. At the same time, researchers from different countries are trying to find the principles of this great spirituality, to express their originality. The book "High Spirituality - Invincible Power" by the first President of Uzbekistan, I. Karimov, is the first reason why the national spirituality is raising the highest peaks . When contemplating the virtues and aspirations of the people in the spiritual world, he writes: "When it comes to such symbols of the peoples of the East and the people of our country, I think it is necessary to pay a special attention to their historical and social grounds. It is well known from the history that the population of Central Asia is inhabited by valleys and large water sources, along rivers and rivers. The region, surrounded by steppes and deserts, whose nature and complexity is very complex, requires that these nations and peoples have mingled together for thousands of years, to be close friends and to live one another harder. " The First President of the Republic of Uzbekistan . As Karimov's assessment shows, the high spirituality of the Uzbek people has been created and developed as an objective and historical necessity.

2. MAIN PART

But this is not just the beginning of the nation's life. Today, the preservation and development of this high spirituality requires the time itself. Indeed, as we have seen in the preceding paragraph, the present stage of human development has seriously threatened the existence, the way of life, and the mentality of the nation, the number of factors and means directed against the spiritual world of these nationalities has increased dramatically. Their ignorance is to ignore the nation's destiny.

At the same time, as it does not have the objective impact of contemporary civilizations on the individual, it is not uncommon for the diversity of mentality, consciousness and activities, the subjective factors that threaten the way of life and health, and the more prominent the tools are.

Affected factors

Factors affecting the security of a person are divided into the following groups:

1. **Socio-political threats** (wars, revolutions, genocide, measures aimed at sharpening the social status, etc.). We are well aware that there are several scenarios of social tension, and groups that implement these scenarios.

2. **Physical Threats** (Measures to Improve the Living Conditions of the Person through Improper Health, Violence of the Person, etc.). Various food products are used to breach the health of the person. As you know, every nation has its own diet. This diet has been formed over the centuries based on local conditions. For example, in the north, sheep and beef are used more frequently in the southernmost areas if the northern peoples drink cold pork. Consequently, if a product is advertised on products that do not fit into local circumstances, it can be consumed if one or two generations pass and their negative emotions begin to emerge.

3. **Genetic Threats** (Anyone Who Is Indigenous). The use of various energy drinks and biological additives is a tradition. However, these methods of threats are extremely complex.
4. **Reproductive Threats** (Measures to Reduce Child Abuse). The most common method of such threats is pharmacology. The drugs being exported may contain elements that may be disadvantageous to their appearance. Particular results can be achieved by exporting garments that do not fit into the local environment (say, soap and winter heat).

5. **Major Threats.**

Spiritual threats play a special role in the issues that threaten the security of the person. Before defining its essence, it is necessary to refer to the well-known theoretical conclusions of the theory of fortunetelling. As you know, when it comes to spirituality, it is important to distinguish between the concept of "spiritual aspect of the spirit" and "the spiritual image of man." The spiritual aspect of society includes a combination of political, legal, ethical, religious, philosophical, scientific, aesthetic, economic, ecological and other views, knowledge, ideas, imaginations, attitudes, and so forth, created by human intelligence.

3. RESEARCH DISCUSSIONS

The views and notions used in the daily life of people constitute social psychology, creative analysis, systematized and theoretical knowledge is a social ideology. The spiritual appearance of man consists of his qualities, beliefs, principles, and vital position in his life. In social philosophy, they use the term "personality" to describe these elements.

When we consider conclusively based on theoretical conclusions, spiritual threats can be directed against the spiritual sphere of society or the spiritual image of man. The First President of the Republic of Turkey I. In Karimov's book, "High Spirituality - Invincible Power," the essence of these factors, which threaten the spirituality of our nation, the spiritual world of our people, is disclosed.

4. CONCLUSION

"It is a spiritual threat," he wrote. The First President of the Republic of Turkey I. Karimov must first refer to ideological, ideological and informational attacks aimed at preventing any person from being literally free, irrespective of their language, religion or belief, and aimed at the deterrent of his / her spiritual world. "In this definition, The following are the two types of attacks: a) "Attacks on the fact that every person is literally free, regardless of language, religion or belief."

When we consider that human being is only a community, it is about the factors and means that threaten the spirituality of society; b) Attempts by a human being to "devise a purely psychological world." Here are some factors and means directed against the spiritual image of a person.
